

FREE COMMUNITY EDUCATION CLINIC

Peptides & Biohacking Q&A

Bring your labs. Learn how recovery, metabolism, hormones, inflammation, sleep, and performance can be discussed through a lab-driven framework.

Saturday, May 16th

10:00 AM – 11:30 AM

CrossFit Blaze

01

Know your starting point

CBC, CMP, A1c, fasting insulin, lipids, thyroid markers, hormones, inflammatory markers, and recovery context.

02

Map the bottleneck

Fat loss, gut health, skin inflammation, injury recovery, sleep, energy, cognition, and longevity all require different questions.

03

Ask smarter questions

Walk away with better questions for your clinician—not one-size-fits-all internet protocols.

What we'll cover

- ✓ GLP-1 and metabolic health conversations
- ✓ LIPO+ support and why nutrients matter
- ✓ Peptide categories: recovery, gut/skin, GH, mitochondrial, immune
- ✓ Safety, contraindications, and when labs come first
- ✓ How CrossFit athletes can avoid guessing

Start here

Use the short questionnaire before the clinic so your questions are more targeted.
